Shankar Agarwal

Azure Big Data Developer

SUMMARY

Experienced Big Data Engineer with a proven track record of designing and implementing efficient ETL processes using Azure Cloud and PySpark. Proficient in Python, SQL, Pyspark and distributed data platforms. Adept at collaborating with cross-functional teams to deliver high-quality solutions.

PERSONAL INFORMATION

shankar.agarwal@trendytech.in | 9876543210 | Bengaluru, India | <https://www.linkedin.com/in/shankar-02079>

SKILLS

Python	SQL	Java	Scala	Spark	Hadoop
PySpark	Tableau	PowerBI	Git	Linux	Cloud
ETL	DBA	DevOps	Networking	Security	AI/ML

WORK EXPERIENCE

Tecco (Software Engineer II) 06/2022 - Present Bengaluru

Achievements/Tools:

- Led the design and implementation of a **Data pipeline**, reducing data processing time by 25%.
- Involved in Building Data Warehouse, Data modeling and Data ingestion activities.
- Implemented data quality checks, resulting in a 15% improvement in data accuracy.
- Collaborated with Stakeholders and Data Scientist Team to integrate their models into production workflows.
- Conducted performance tuning on SQL queries, optimizing query retrieval by 30%.
- Migrated On-prem Data Distribution to Azure Cloud Distribution and Hive Data Warehouse using PySpark.

TCS (Senior Software Engineer) 11/2021 - 06/2022 Mumbai

Achievements/Tools:

- Involved in POCs for Data integration in Azure.
- Working in a team of 4 members responsible for driving POCs on Data workflow in Azure Data Factory.
- Working on POCs to set up DevOps environment using Jira, Azure code deploy on DataBricks and ADLS Gen2 environments.
- Worked on Azure Data Factory, DataBricks, KQLS Gen2, Delta lake and various other Azure services.
- Used Informatica ICD cloud services and GCP for performing ETL operations and Building data pipelines.

IBM India (Big Data Developer) 09/2019 - 11/2021 Mumbai

Achievements/Tools:

- Worked on Hive queries for creating and querying HIVE tables to retrieve useful analytical information.
- Used Sqoop to import large data from traditional RDBMS to HDFS and handled incremental Sqoop.
- Worked on Data Clustering, Data Ingestion, Data Transformation Activities.
- Used the processed data into Hive External table and used Partitioning and Bucketing techniques to fine tune the performance, involved in choosing different file formats.
- Used Scala to process the data in Spark.

PROJECTS

Customer 360 Analytics

- Executed data-driven analysis using Azure DataBricks and Data Factory to uncover customer order patterns, providing valuable insights that informed customer engagement strategies.
- Led a comprehensive analysis of customer spending, utilizing SQL queries and data aggregation, resulting in actionable insights for targeted marketing efforts and a notable 30% increase in campaign effectiveness.
- Facilitated strategic decision-making by determining the number of orders placed by each customer, utilizing SQL queries and data manipulation, leading to a substantial 20% increase in customer satisfaction.

Landing Time

- Orchestrated a Finance Domain project, employing PySpark and AWS Cloud, optimizing lending processes for new banks and achieving 20% reduction in processing time.
- Applied data cleaning techniques, resolving 95% of duplicates, null values, and duplicate issues, ensuring data integrity for downstream teams.
- Implemented Slowly Changing Dimensions (SCD) strategies, handling updates seamlessly and enhancing data accuracy by 25%.
- Streamlined deployment across environments with 40% reduction in deployment time using CDK practices.

ACHIEVEMENTS

Tecco Spot Award (04/2022 - Present)

The team received "tecco spot award" for exceptional achievement demonstrated exceptional performance in a specific project, team, or client.

Top Inspector Award (03/2022 - Present)

Top member of the specific team in a given or other department who performs well in a particular area or project while maintaining Customer service and growth for company.

Technical Event Organizer (06/2018 - 06/2018)

Organized a Technical Event on Big Data Technology. The event had only 40 attendees and 10 speakers. The event was a success.

EDUCATION

Shri Ganesha Memorial College of Engineering and Management (06/2015 - 06/2018)

Bachelor of Information Technology

CERTIFICATES

Cloud Practitioner Foundational (06/2021 - 06/2021)

Big Data Developer Masters Programme (11/2022 - Present)

Shankar Agarwal

Azure Big Data Developer

SUMMARY

Skilled Big Data Engineer with 4 years of outstanding performance record in designing and implementing efficient ETL processes. Proficient in Azure Cloud and PySpark. Proficient in Python, SQL, Pyspark and cloud-based data platforms. Master in collaborating with cross-functional teams to deliver high-quality solutions using project costs by around 20%.

PERSONAL INFORMATION

WORK EXPERIENCE

Tecco (Software Engineer II) 06/2022 - Present Bengaluru

Achievements/Tools:

- Led the design and implementation of a **Data pipeline**, reducing data processing time by 25%.
- Reduced redundant activities of 3 departments by Building Data Warehouse, Data modeling and Data ingestion activities.
- Implemented data quality checks, resulting in a 15% improvement in data accuracy.
- Conducted performance tuning on SQL queries, optimizing data retrieval by 30%.
- Migrated On-premise Data Distribution to Azure Cloud Distribution and Hive Data Warehouse using PySpark in less than 1 week.

TCS (Senior Software Engineer) 11/2021 - 06/2022 Mumbai

Achievements/Tools:

- Facilitated in POCs for Data integration in Azure achieving 100% efficiency.
- Achieved 100% consistency in a team of 4 members, towards driving POCs on Data workflow in Azure Data Factory.
- Strengthened POCs to set up DevOps environment using Jira, Azure code deploy on DataBricks and ADLS Gen2 environments.
- Achieved proficiency in Azure Data Factory, DataBricks, ADLS Gen2, Delta lake and other Azure services.
- Reduced cost by 100 man hours through Informatica ICD cloud services and GCP for performing ETL operations and Building data pipelines saving 100 man hours.

IBM India (Big Data Developer) 09/2019 - 11/2021 Mumbai

Achievements/Tools:

- Worked with 100% consistency in Hive queries by creating and querying HIVE tables to retrieve useful analytical information.
- Reduced cost of Sqoop to import large data on 10 machines from traditional RDBMS to HDFS.
- Proficient in Data Clustering, Data Ingestion, Data Transformation Activities.

PROJECTS

Customer 360 Analytics

- Executed data-driven analysis using Azure DataBricks and Data Factory to uncover customer order patterns, providing valuable insights that informed customer engagement strategies, resulting in increasing repeat orders count by 30%.
- Led a comprehensive analysis of customer spending, utilizing SQL queries and **data aggregation**, resulting in actionable insights for targeted marketing efforts and a notable 30% increase in campaign effectiveness.
- Facilitated strategic decision-making by determining the number of orders placed by each customer, utilizing data manipulation, leading to a substantial 20% increase in customer satisfaction.

Landing Time

Work Experience

BEFORE

- Involved in Building Data Warehouse, Data modelling and Data Ingestion activities.
- Migrated On prem Data Distribution to Azure Cloud Distribution and Hive Data Warehouse using Pyspark
- Involved in POCs for Data migration to Azure.
- Used Informatica IICS cloud services and IDF for performing ETL operations and Building data pipelines.
- Worked on Hive queries for creating and querying HIVE tables to retrieve useful analytical information.
- Used Sqoop to import large data from traditional RDMS to HDFS and handled incremental Sqoop.
- Load the processed data into Hive External table and used Partitioning and Bucketing techniques in hive to improve the performance, involved in choosing different file formats

AFTER

- Involved in Building Data Warehouse, Data modelling and Data Ingestion activities **helping 3 departments.**
- Migrated On prem Data Distribution to Azure Cloud Distribution and Hive Data Warehouse using Pyspark **in less than 1 week.**
- Involved in POCs for Data migration to Azure **delivering 100% efficiency.**
- Used Informatica IICS cloud services and IDF for performing ETL operations and Building data pipelines **saving 100-man hours.**
- Worked on Hive queries for creating and querying HIVE tables to retrieve useful analytical information **with 100% consistency.**
- Used Sqoop to import large data **on 10 machines** from traditional RDMS to HDFS and handled incremental Sqoop.
- Load the processed data into Hive External table and to create Partitioning and Bucketing techniques in hive to improve the performance, involved in choosing different file formats like ORC, Parquet format **reducing 50 man hours per activity.**

Projects

- Executed data-driven analysis using Azure Databricks and Data Factory to uncover customer order patterns, providing valuable insights that enhanced customer engagement strategies.
- Executed data-driven analysis using Azure Databricks and Data Factory to uncover customer order patterns, providing valuable insights that enhanced customer engagement strategies, **resulting in increasing repeat orders count by 30%.**

Achievement

BEFORE

- The Spot Award is typically given to employees who have demonstrated exceptional performance or made a significant impact on a project, team, or client
- Organized Event Named Debugging at College Technical Fest. This Event basically focused on Enhancing the skills of Participants in various Technologies. Managed a team of 4 peoples and successfully Organized the Event

AFTER

- Awarded 1st prize amongst 5000 participants for demonstrated exceptional performance or made a significant impact on a project, team, or client
- Organized 1st ever Technical Event Named Debugging at College Technical Fest with gathering of 20,000 people. This Event basically focused on Enhancing the skills of Participants in various Technologies. Managed a team of 4 peoples and successfully Organized the Event
